

DataCore

AI-Powered SME Lending Engine

See every business. Fund every future.

The lending engine banks have been missing.

03 SMEs Grow, Banks Grow With Them

When SMEs get the right funding at the right time, they scale, hire, and expand — building lasting relationships with the banks that funded them. The healthier the SME sector becomes, the more the whole banking ecosystem benefits.

02 Every SME, a Data Asset

Each connected business becomes a live, verified view of its actual operations. Across a portfolio, this becomes a platform — banks can connect their SMEs to the right suppliers, partners, and opportunities worldwide, opening new revenue streams that go far beyond loan interest.

01 Lend Like You Know Them

Every SME is judged by how it actually operates — its real revenue, its real patterns, its real risk — not by the industry label it happens to fall under.
